Submitted for the University Viva-Voce Project examination held on …..... at P.S.V College of Engineering and Technology(An Autonomous Institution), Krishnagiri.

INTERNAL EXAMINER **EXTERNAL EXAMINER**

ACKNOWLEDGEMENT

At the very outset, we wish to express our sincere thanks to all those who were involved in the completion of this project.

Our most sincere salutations go to Anna University, Chennai that gave us an opportunity to have sound base of Computer Science and Engineering.

We acknowledge our profound intellect of gratitude to our beloved chairman **Dr.P.SELVAM., M.A., B.Ed., M.Phil., Ph.D.,** for his support and coordination.

We also express our gratitude to our honourable principal **Dr.P.LAWRENCE.,M.E.,Ph.D.,** for his timely advice and his encouragement.

We offer our sincere thanks to **Prof C.PRAKASH NARAYANAN, M.E.,(Ph.D).,** Head of the Department of Computer Science and Engineering for giving this prospect and his full support.

We consider it as a great privilege to place a record of our deep sense of gratitude to our Internal Guide **Prof Dr.S.CHANDRA SEKARAN M.E.,Ph.D.,** Professor, Computer Science and Engineering for being the great inspiration to us.

We also express our thanks to our Department Faculty members, our parents and our beloved friends.

ABSTRACT

The AI Avatar Assistance for Online Hotel Room Booking system is designed to enhance the efficiency and user experience of hotel reservation platforms. It integrates Artificial Intelligence with an interactive avatar that communicates with users through text or voice. The system allows users to search for hotels easily and view detailed information. Users can apply filters such as location, price, ratings, and amenities. The AI avatar understands user queries and provides accurate responses. It offers personalized recommendations based on user preferences. This reduces the time spent on searching and comparing options. The system makes the booking process simple and interactive. It improves user engagement through intelligent assistance. Overall, it provides a modern and user-friendly booking solution.

The system also includes advanced features such as real-time room availability and secure payment options. Users can complete bookings quickly with minimal effort. The AI avatar guides users step by step throughout the process. It helps in answering queries and resolving issues instantly. The system ensures secure handling of user data and transactions. Booking confirmations and notifications are provided immediately. This increases trust and reliability among users. The platform is designed to be efficient and scalable. It reduces human errors and improves accuracy. Overall, the system delivers a smart and reliable hotel booking experience.

KEYWORDS — Artificial Intelligence, AI Avatar, Hotel Booking System, Natural Language Processing, Machine Learning, Online Reservation System, Personalized Recommendation, Smart Assistant, User Experience, and Automation.
